1. Executive Summary & Project Charter

"To empower customer service organizations with an autonomous, real-time AI Coaching Assistant that augments human agents with instant RAG-grounded troubleshooting steps, sentiment and emotion intelligence, proactive escalation risk prevention, and automated compliance tracking—dramatically elevating customer satisfaction while reducing handle times and onboarding overhead."

Target Key Performance Indicators (KPIs)

KPI Metric	Baseline	Target	Business Value Delivered
First Contact Resolution (FCR)	58%	82%+	+24% increase via instant 500-scenario RAG
Average Handle Time (AHT)	11.5 mins	6.5 mins	43% reduction in conversation duration
Customer Satisfaction (CSAT)	72%	92%+	+20 points via empathetic coaching guidance
Supervisor Escalation Rate	18.5%	< 6.0%	67% reduction via early risk severity scoring
Agent Onboarding Time	6 weeks	1.5 wks	75% acceleration via Interactive Simulator
Post-Interaction Wrap-Up	3.5 mins	< 20s	90% automation via Summary Agent

2. User Personas & Target Workflows

Alex Rivera (Tier 1 Support Agent): Uses split-screen copilot HUD for instant RAG diagnostic steps and 1-click suggestion application.

Sarah Jenkins (QA Compliance Lead): Audits interaction histories via multi-criteria risk filters and exports audit logs to CSV/JSON.

Marcus Vance (VP of Customer Experience): Tracks team health, escalation severity rates, and trending issue categories on the analytics dashboard.

3. Agile Sprint Roadmap (131 Story Points Total)

Sprint	Focus Area	Key Deliverables	Velocity	Status

Sprint 5	Audit & Analytics	SQLite DB, audit modal, CSV/JSON export, chart telemetry	24 SP	DONE
Sprint 6	Cloud & Security	Unified SPA serving, Gunicorn WSGI, Render blueprint, .gitignore	18 SP	DONE

4. Key User Stories & Acceptance Criteria (Gherkin Format)

US-101: Real-Time Customer Emotion & Intent Extraction (5 SP)

Given a customer sends: 'My internet LOS light is flashing red for 3 days and I work from home!'
When analyzed by Customer Understanding Agent
Then sentiment='Negative', emotion='Frustrated / Stressed', urgency='High'
And key entities extract 'LOS light flashing red', '3 days outage'.

US-102: Escalation Risk Severity Assessment (5 SP)

Given a customer message: 'I was double charged, refund today or I cancel and contact my bank!'
When analyzed by Escalation Risk Agent
Then risk score must be >= 75% and level assigned to 'Critical'.

US-201: 500-Scenario ChromaDB Knowledge Retrieval (8 SP)

Given 6 PDF support manuals covering 500 scenarios
When similarity search executes against 5,182 vector chunks
Then top-3 articles are retrieved with similarity scores and cited source excerpts.

5. Quality Assurance & Risk Controls Matrix

Risk ID	Description	Severity	Mitigation Strategy	Status
RSK-01	LLM Rate Limiting (429 HTTP)	High	5-tier model fallback cascade (Nemotron -> LFM -> Gemma -> GLM)	MITIGATED
RSK-02	AI Policy Hallucination	High	Strict RAG grounding in 500 verified scenarios via ChromaDB	MITIGATED
RSK-03	API Key Exposure on GitHub	Critical	Root & backend .gitignore with .env.example templates	MITIGATED
RSK-04	CORS Blocking on Web	Medium	Unified single-port serving (Flask serves React SPA on port 5000)	MITIGATED
